

NAPLES COMPREHENSIVE HEALTH

Robert Cubeddu, MD

President, Rooney Heart Institute; The Brynne and Bob Coletti Endowed Chair;
Naples Comprehensive Health (NCH)

Dr. Robert Cubeddu comes to NCH from the Cleveland Clinic Florida, Weston Hospital, where he has practiced since 2015 and served as Chair of Cardiovascular Medicine. He brings a reputation of excellence and exemplary quality with excellent patient outcomes.

Dr. Cubeddu received his medical education and was valedictorian of his graduating class at the Universidad Central de Venezuela. He completed his post-graduate training as an honorary Chief Resident and Cardiovascular Fellow at Mount Sinai Medical Center in Miami. Subsequently, Dr. Cubeddu finalized his advanced training in Interventional Cardiology and Structural Heart Disease, becoming one of the first in the nation to pursue this subspecialty at the Massachusetts General Hospital, Harvard Medical School.

Over his career, he has effectively established a robust academic practice and international reputation by means of his unique minimally invasive transcatheter skills to treat a multitude of valvular, structural, and congenital heart conditions, including: TAVR, Mitraclip, transcatheter mitral valve replacement, PVL closure, ASD, PDA and PFO closure, Watchman among others, providing patients a safe and attractive alternative to open heart surgery.

His academic attributes are best reflected by his involvement in numerous scientific publications, including original manuscripts, abstracts, and book chapters. He has served as Principal Investigator in a multitude of nationally recognized clinical trials and is involved in the early development of cutting-edge technology. He continues to serve on the editorial board of major peer-review journals and as an expert field panelist in a multitude of international cardiovascular medical meetings.

One of Dr. Cubeddu's top priorities is to empower physicians and staff with the tools they need to continue to provide high-quality, personalized care to patients and build upon relationships that promote exceptional patient outcomes.
